# BAGAJE

*Definition according to the RAE:*

*1. n. Luggage or set of belongings that a person carries. carries with them when traveling or moving from one place to another.*

*There is a quote by Anne Carson that defines it better for me the meaning of "baggage," and it says:*

*"The only rule of travel is: don't come back the same as you were. Come back different."*

*Because when I travel, I always end up coming back with more than what I take with me, and what I bring back becomes part of me, of my cooking, and of my everyday life.*

*This menu is the result of a symbiosis between what is ours and that baggage; sometimes it's a spice, a nuance, a subtle hint of something, and other times it's a technique that transforms its appearance without losing its essence.*

*Baggage and essence: two words that perfectly define my cooking, and therefore the cuisine of Yuba Experience.*

*Thank you for joining me on this journey, you already know the only rule.*

*"Come back different."*

*Mario Rosado*
